

# L & E STONE AND CABINET, INC.

## EXAMPLE

\*This was done in a computer design program. Go ahead and do yours by hand with paper and pen.

## CABINET DESIGN

Before you come to our showroom for a cabinet design, you will need to measure your space and bring a diagram or layout of your kitchen.

1. Draw (by hand) a top view diagram/layout of your kitchen, showing its shape.
2. Measure each wall and your ceiling height in inches.
3. Measure the depth and height of any soffits above your cabinets.
4. Measure the location of each window or door from the nearest wall to the nearest outside edge.
5. Also measure the width of each door and window from each outside edge of trim.
6. Measure the center of your sink plumbing from the nearest wall.
7. Measure the location of the stove from its center to the nearest wall.
7. Measure your fridge width, height, and depth.
8. Let us know if you will have a hood or microwave above your stove.
